Dear professor Siyan Chen,

this letter is to inform you that your paper "Does increasing the retirement age increase youth unemployment? Evidence from an agent-based macro model", co-authored with professor Saul Desiderio, has been selected to participate to 11th International Workshop on Computational Economics and Econometrics 2023 – Iwcee23 in Rome on next 6th and 7th July.

The occasion of the workshop would also be useful to discuss with you and Professor Saul Desiderio possible collaborations with researchers of the Research Institute on Sustainable Economic Growth in the application of the Agent Based Modeling to the development of PhD careers, a topic of particular interest to us. For this purpose we would like to invite you to attend our Institute in Via dei Taurini 19, 00185, Roma also for the days surrounding the Workshop, from 3th to 10th July 2023.

I hope you can accept our invitation.

All the best,

On behalf of the scientific committee of the IWcee23

dr. Lucio Morettini
