Dear Dr. Shen!

In Saint-Petersburg «Olympia Garden Hotel» from 24-28 May, 2026 will take place the XIV International exhibition and conference “Waterproofing of underground and embedded structures AQUASTOP”. The organizers are the Russian Union of Builders and the International Analytical review “ALITinform: Cement. Concrete. Dry Mixtures”.

AQUASTOP conference exists since 2001. It is the central event in the field of waterproofing of underground and embedded structures in Russia and CIS countries. Among the regular participants of the conference are headmen of Metro Tunnel Services from Moscow, St. Petersburg and other cities of Russia and CIS countries, as well as the prominent specialists of construction and engineering companies, project organizations and universities, representatives of waterproofing associations.

AQUASTOP business program includes more than 25 scientific and analytical presentations from the leading specialists and technical tour where the participants will have a chance to get acquainted with the implemented waterproofing projects, meetings of the Heads of Metro Tunnel Construction Services of CIS countries.

The topics of AQUASTOP-2026 are: modern trends in waterproofing technologies for underground structures, waterproofing materials, methods and equipment for waterproofing works; materials for injections; sprayed membranes and PVC and HDPE membranes; shotcreting, normative base of waterproofing of underground and embedded structures; Tunnel drainage systems, quality control of waterproofing systems; exploitation and repair of waterproofing systems; and many more.

We invite you to take part in the International Waterproofing conference AQUASTOP-2026 as a keynote speaker and make a section about the experience of Chinese companies in waterproofing of underground and embedded structures. We look forward to long-term successful partnership!

Respectfully yours,

Chairman of the Committee of
The Russian Union of Builders for
cement, concrete and dry mixtures,
President of the Group of companies “ALIT”

Dr. Eduard Bolshakov
